

Preparing your water treatment equipment after closedown

Water Treatment BWT bestmax cartridges

Please follow these steps before switching on any coffee equipment

Please follow these steps to ensure your water treatment equipment is commissioned properly.
Should you require help, please call BWT UK Ltd on 01494 838129

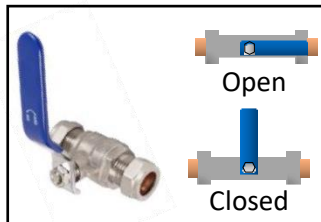

The following steps should be followed by a competent person only

You will require a clean bucket

Locate the filter, usually found under the counter

Locate the water isolation valve and ensure it is fully open

Locate the flushing hose on the filter head

Place the open end of the flushing hose into the bucket

Press and hold the valve down so water starts to fill the bucket

For XL Fill 12 full buckets
(90 litres)
For 2XL fill 20 full buckets
(150 litres)

Release the valve
